

INFOTC 2040 Programming Languages and

Paradigms

Syllabus (v1.0)

This course presents programming principles and their syntactical representation and implementation across languages including those that are compiled and interpreted. The course shows how to implement algorithms and data structures to solve problems while utilizing paradigms offered by the programming languages such as procedural, object-oriented, protocol-oriented, functional, and declarative. Language support for strong and weak typing and type safety are covered along with support for optional values. This course provides experience in developing algorithms and determining their efficiency, designing application architecture, and developing applications. Building and using libraries/application programming interfaces is covered. Git and GitHub are used for code versioning and collaboration. Integrated development environments (IDEs) are used for managing, building, debugging, and testing applications.

The following topics are covered:

- * programming paradigms such as procedural, object-oriented, protocol-oriented, functional, and declarative.
- * programming languages, their syntax, abilities, and supported paradigms.
- * data structures.
- * strong and weak typing, type safety.
- * the null reference/pointer problem and the use of optionals.
- * algorithm design and efficiency analysis and measurement utilizing different paradigms.
- * application design and architecture.
- * building and using libraries and application programming interfaces (APIs).
- * code versioning systems, Git, and GitHub.
- * integrated development environments (IDEs) for managing, building, debugging, and testing applications.

100% online course.

You must own, or have access to, a computer to take this course on which you can install software. If you are in Columbia, MO while taking the course you can use the iMac lab in C1205/06 Lafferre. The iMac lab has all the required software installed on the computers.

Credit Hours

3 hours

Prerequisites

INFOTC 1040 Introduction to Problem Solving and Programming OR prior experience with programming and consent of instructor.

Class Location and Meeting Time

This is an online course. There are no physical class meetings.

The fall and spring semesters are 15 weeks long plus a final's week. The summer semester is 8 weeks long. The course officially starts on *start_date*. Your access to Canvas and the first week's modules are available on Saturday, *course_access_date*. Each week you are provided with new modules on Saturday and the work needs to be completed by the following Friday. Assignment, quiz and test solutions are posted the week following their assignment. This means there can be no extensions on assignments. **Assignments must be submitted by 11:59pm on the Friday due date each week to receive credit.**

Assignments

All assignments (quizzes, exams, activities, challenges, and projects) must be completed by the due date/time to receive credit.

You must fulfill the requirements of an assignment submission to receive credit for that assignment. Any information you are asked to provide and files you are asked to supply must be present to receive credit for the assignment. If you are asked to follow a specific procedure or utilize a convention you must do so to receive credit. For example, if you are asked to name a project in a specific way and you do not follow the rules provided you will receive a zero on the assignment. If you are unsure of what you are to do you must ask and receive clarification before submitting your work.

Required Textbooks

There is no required textbook for this course. The materials required for the course are provided online.

Web Sites

The following are some of the sites that will be used during the course. Other sites are provided during the course.

This course utilizes Canvas for course materials, communications, and assignments:
<https://courses.missouri.edu>

Git
<https://git-scm.com/>

GitHub
<http://github.com>
Every student is required to have a GitHub account and will know or learn how to use git.

Hardware/Software Requirements

You must own, or have access to, a computer to take this course on which you can install software. If you are in Columbia, MO while taking the course you can use the iMac lab in C1205/06 Lafferre. The iMac lab has all the required software installed on the computers.

Regarding the iMac lab and DoIT labs, BE AWARE that the files you create are erased when you log out of the computer. You must save the files you create to some other storage before you log out or you will lose them.

You also need to be able to watch online videos because some of the course content is video-based. If you can watch YouTube videos at HD resolution you have the needed ability.

Accounts

You need to have a GitHub account.

GitHub Account

You are to use GitHub with this course. If you already have a GitHub account then you can use it. If you don't have a GitHub account the best option is to sign up for the GitHub Student Developer Pack at: <https://education.github.com/pack> This offers "Unlimited private repositories (normally \$7/month) while you are a student." You will need to create private repositories for this course.

Learning Support

An email account dedicated to this course has been established where you are to email the instructor and support staff. This email account is monitored by the instructor and the staff. Please use this email account:

infotc2600@missouri.edu

Locations

Naka Hall is the new name for Engineering Building West (EBW). MU Map, at present, calls it Engineering West:

<http://map.missouri.edu/index.html?bldg=37022>

Reynolds Journalism Institute/RJI Building on MU Map:
<http://map.missouri.edu/index.html?bldg=37074>

Instructor

Dale Musser, Ph.D.
Associate Teaching Professor, Computer Science
Associate Professional Practice Professor, School of Journalism
Chief Technology Advisor, Reynolds Journalism Institute
Mailbox: 201 Naka Hall (Engineering Building West)
Engineering Office: 107A Naka Hall (Engineering Building West)
Journalism Office: 040 Walter Williams
573.864.4230 cell (voice/text)
musserda@missouri.edu

Grading

The course grade is calculated as a weighted average of grades in five categories. In each category, a grade is earned as a percentage from 0% to 100% that is based on an equal averaging of items in that category. The percentage grade for each category is multiplied by the weighting percentage to determine the category's contribution to the total grade. The sum of contributions from the five categories yields the final grade.

Categories and Weights

Quizzes: 20%
Activities, Challenges, Projects: 20%
Midterm Exam: 20%
Final Exam: 20%
Final Project: 20%

Grading Scale

A+ = 98–100%, A = 93–97%, A- = 90–92%
B+ = 87–89%, B = 83–86%, B- = 80–82%
C+ = 77–79%, C = 73–76%, C- = 70–72%
D+ = 67–69%, D = 63–66%, D- = 60–62%
F = 59% and below

Academic Honesty

Academic integrity is fundamental to the activities and principles of a university. All members of the academic community must be confident that each person's work has been responsibly and honorably acquired, developed, and presented. Any effort to gain an advantage not given to all students is dishonest whether or not the effort is successful. The academic community regards breaches of the academic integrity rules as extremely serious matters. Sanctions for such a breach may include academic sanctions from the instructor, including failing the course for any violation, to disciplinary sanctions ranging from probation to expulsion. When in doubt about plagiarism, paraphrasing, quoting, collaboration, or any other form of cheating, consult the course instructor.

Classroom Misconduct

Classroom misconduct is defined by the University of Missouri's collected rules and regulations are also outlined in the M-Book Student Code of Conduct.

See:
https://www.umsystem.edu/ums/rules/collected_rules/programs/ch200/200.010_standard_of_conduct
<https://accountability.missouri.edu/university-policies/>

Classroom misconduct includes forgery of class attendance; obstruction or disruption of teaching, including late arrival or early departure; failure to turn off cellular telephones leading to disruption of teaching; playing games or surfing the Internet on laptop computers unless instructed to do so; harassment, bullying, physical abuse or safety threats; theft; property damage; disruptive, lewd or obscene conduct; abuse of computer time; repeated failure to attend class when attendance is required; and repeated failure to participate or respond in class when class participation is required.

IMPORTANT: Entering a classroom late or leaving a classroom before the end of the period can be extremely disruptive behavior. Students are asked to arrive for class on time and to avoid early departures. Instructors have the right to deny students access to the classroom if they arrive late and have the right to dismiss a student from the class for early departures that result in disruptions.

Under MU policy, your instructor has the right to ask for the removal from the course for misconduct, disruptive behavior or excessive absences. The instructor then has the right to issue a grade of withdraw, withdraw failing or F. The instructor alone is responsible for assigning the grade in such circumstances.

Dishonesty and Misconduct Reporting Procedures

MU faculty are required to report all instances of academic or classroom misconduct to the appropriate campus officials. Allegations of classroom misconduct will be forwarded immediately to MU's Vice Chancellor for Student Affairs. Allegations of academic misconduct will be forwarded immediately to MU's Office of the Provost.

Title IX Information

The University of Missouri prohibits all forms of sex or gender discrimination, including sex-based violence. If you or someone you know has experienced sex discrimination or been harassed or assaulted, you can get help at the Relationship & Sexual Violence Prevention (RSVP) Center, a confidential resource, at rsvp@missouri.edu or (573) 882–6638, or go to <https://rsvp.missouri.edu/>. You can also contact the Title IX Office (title9@missouri.edu; (573) 882–3880; or www.title9.missouri.edu). Mizzou employees are required to report all incidents of sex discrimination to the Title IX Office.

Students with Disabilities

If you anticipate barriers related to the format or requirements of this course, if you have emergency medical information to share with our instructors, or if you need to make arrangements in case the building must be evacuated, please let us know as soon as possible. You can email Dale Musser at musserda@missouri.edu, text or call 573–864–4230, or speak to Dale in person.

If disability related accommodations are necessary (for example, a note taker, extended time on exams, captioning), please register with the MU Disability Center (<http://disabilitycenter.missouri.edu>), S5 Memorial Union, 573- 882–4696, and then notify your instructor of your eligibility for reasonable accommodations.

Intellectual Pluralism

The University community welcomes intellectual diversity and respects student rights. Students who have questions or concerns regarding the atmosphere in this class (including respect for diverse opinions) may contact the departmental chair or divisional director; the director of the Office of Student Rights and Responsibilities (<http://osrr.missouri.edu>); the MU Equity Office (<http://equity.missouri.edu>), or equity@missouri.edu.

All students will have the opportunity to submit an anonymous evaluation of the instructor(s) at the end of the course.

University of Missouri-Columbia Notice of Nondiscrimination

The University of Missouri does not discriminate on the basis of race, color, religion, national origin, sex, sexual orientation, gender identity, gender expression, age, disability or status as a protected veteran.
